Response to Amendment

The examiner is in receipt of applicant's response to office action mailed 3/22/2007, which was received 9/24/2007. Acknowledgement is made to the amendment to claim 1 leaving claims 1,2,4-10 as pending in the instant application. The Applicant's amendment and comments have been carefully considered and were found persuasive, therefore the following reasons for allowance are presented below:

Oath/Declaration

The title of the invention is incorrect, a new declaration with a corrected title is required.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:
Claims 1,2,4-10 are allowable.

The following is an Examiner's statement of the reasons for allowance for all independent claims 1.

The present invention is directed to a method for many items of a specified seller are displayed in a moving display at the client computer system so that many items are observable by the client without use of the selection device (e.g., mouse) at the client computer system and the search engine of the auction system to find the items (see specification page 2, lines 28-31, the examiner understands that movable as used in claim one refers to the selected items moving without the use of a selection device). Inter alia, "...displaying selectable images, the picture displaying module being configured to obtain a set of selectable images of the selected seller's auction items

based on the received information that selects the particular seller, to moveably display in the item document".

Discussion of most relevant art:

US Patents and PG-PUB

(i) US PG PUB, 2003/0058457 to Fredlund et al. teaches a system for processing digital images from a web site. Fredlund, however, fails to render the application's above-mentioned limitations obvious.

(ii) US Patent, 5,726,687 to Belfiore et al. teaches a system for moving an object by moving the cursor. Belfiore, however, fails to render the application's above-mentioned limitations obvious.

Non-Patent Literature

(iii) Activa, teaches selecting items from a plurality of auction sites and presenting them for selection by the user. Dunham, however, fails to render the application's above-mentioned limitations obvious, because it does not teach displaying the items in a moveable display as claimed in the instant invention.

(iv) Hindu, teaches using a mouse to click on a display and causing the window contents to be scrolled in the direction of the pointer Hindu, however, fails to render the application's above-mentioned limitations obvious, because it does not teach displaying the items in a moveable display as claimed in the instant invention.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
